

## Water/Wastewater Engineer

### The Position

Summit Engineering, Inc. has an opening for a Staff or Project Engineer for our Water/Wastewater Division. You would join a team of engineers who focus on water treatment and delivery, and wastewater treatment and reuse. We offer a diverse range of services and are contracted to perform challenging projects. Summit's market areas such as wineries, breweries, residential, municipal, commercial and industrial facilities.

This Division is recognized as water and wastewater experts in the North Bay and specifically within the wine industry for its work on one-of-a-kind and first-of-a-kind facilities. As a Water/Wastewater Engineer you will be responsible for engineering and design tasks, and using your education, training and experience to solve complex engineering problems. In Summit's office environment you will have the opportunity to work directly with firm leaders and experienced engineers on a wide range of interesting projects.

Besides regular benefits, our employees enjoy things like a Weekly Breakfast, Monthly Wine Downs, FUN Committee activities throughout the year, continued education, and more. Plus - we work on a 9/80 schedule, which means you have **every other Friday off!**

### Job Requirements

- B.S. Degree in Environmental, Civil, Chemical or Mechanical Engineering. (Master's degree related to water or wastewater treatment preferred but not required.)
- Coursework or job experience related to water and wastewater treatment processes is essential.
- Understanding of hydraulics and fluid conveyance.
- Basic knowledge of AutoCAD and hydraulic modeling software.
- E.I.T. certification.
- Ability and intent to pursue and obtain a California P.E.
- Exceptional critical thinking skills. Strong technical and professional writing skills. Excellent interpersonal and communication, and a high sense of urgency.
- Valid drivers' license and eligible to work in the United States.

### Company Description
